Please keep Austin in your prayers. He was hospitalized on Wednesday for ITP (Idiopathic Thrombocytopenic Purpura). ITP is an autoimmune disorder in which the blood doesn't clot normally. ITP can cause excessive bruising and bleeding. An unusually low level of platelets in the blood results in ITP.

Austin was first diagnosed in elementary school and the last episode was in high school. The trigger points are still unknown. He was given a blood transfusion and put on steroids. They will keep him through the weekend to monitor him. xoxo
